LOCK-N-LOAD®

DIE BUSHING

3-PACK

- Allows you to load and unload dies with a simple twist
- Positive locking action hold dies in perfect alignment

Hornady®

Lock-N-Load® Die Bushing

The Lock-N-Load® bushing system will forever change the way you switch from one caliber to another.

Lock-N-Load® technology allows you to change dies and start loading another caliber in a matter of seconds.

Thread your die (7/8"-14 thread) into the Lock-N-Load® Die Bushing and insert the assembly into the press bushing. Twist it clockwise to lock it in to position, then adjust your die as usual and tighten the lock ring.

Remove by twisting counterclockwise 1/6 turn. The die assembly comes out and the next die assembly can go in.

Hornady® reloading presses come with Lock-N-Load® bushings installed. You can also convert other presses to Lock-N-Load® technology (1 1/2"-12 thread) with the Hornady® Press Conversion Kit.

CA WARNING: Risk of cancer and reproductive harm from exposure to lead. See www.P65Warnings.ca.gov
